### **VOLUNTARY ANNOUNCEMENT BEING ONE OF THE MAJOR 4G BASE STATION ANTENNA SUPPLIERS IN CHINA**

This announcement is made by Comba Telecom Systems Holdings Limited (the “Company”, together with its subsidiaries, are hereinafter referred to as the “Group”) on a voluntary basis.

The Company is pleased to announce that the 4G base station antennas of the Group have been widely deployed in the 4G trial networks in China. As of the date of this announcement, the Group received orders for its 4G LTE base station antennas with the total quantity exceeding 150,000 units for this financial year, making the Group one of the major 4G base station antenna suppliers in China.

As one of the major global suppliers of mobile base station antennas, the Group has invested in the R&D and technologies of 4G antennas and has obtained proprietary intellectual property rights for its core technologies since 2010. The products cover LTE-FDD (including 700MHz, 800MHz, 1800MHz, 2100MHz and 2600MHz) and all bands of TD-LTE. The Group has also launched a series of 4G products including LTE independent networks, multi-system antenna sharing networks and camouflaged antennas. These products have been widely utilized in 4G network deployment in overseas countries.

The board of directors of the Company (the “Board”) considers that consecutive wins in the 4G base station antennas tenders from various PRC customers will further set to promote the widespread deployment of the Group’s 4G antennas. With the issue of 4G licences and the approaching 4G deployment boom in China, the Board is confident that the Group will continue to be a global major supplier in the 4G base station antenna market and this will contribute to the business of the Group.

By order of the Board of
